

## At PM&E we machine excellence.

Since 1978, Production Machine has been specializing in machining non-ferrous castings, as well as brass, aluminum, carbon steel & stainless steel bar stock.

PM&E is a contract manufacturer which has the capabilities to produce complex precision parts. The company has 50-70 employees working 24 hours a day five days a week. PM&E currently runs 5 horizontal machining centers, 8 vertical machining centers, 5 drilling and tapping centers, 13 turning centers and 4 with live tooling, making parts from 1/2" diameter bar stock to a 45 lb. sand casting.

PM&E is continuously improving its manufacturing process using "Cellular and Lean Manufacturing" to compete in the world marketplace. Team based manufacturing talents are available immediately.

## CNC MACHINING

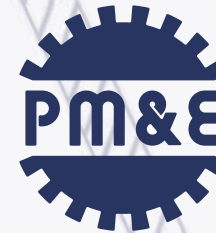

- CNC Turning Centers
- Vertical and Horizontal CNC Machining Centers
- CNC Drilling and Tapping Centers
- Specialization in Contract/Production Machining
- Specialization in Non-Ferrous Casting Machining

## TOTAL QUALITY SYSTEMS

Fully Equipped Including CMM and Precision Measuring Instruments

Comprehensive Quality Systems

- Continuous Improvement
- Cellular Manufacturing

**Production Machine & Enterprises Corp.**  
~ Established 1978 ~

## Mission Statement

Production Machine & Enterprises Corporation is dedicated to providing world class contract machining services by utilizing modern equipment, methods and the objectives for total quality.
